

Advances in Paediatric Dialysis

A 2-day virtual conference for doctors and nurses working with children on dialysis

This course forms part of the core curriculum for training in Paediatric Dialysis. We will discuss the basic principles of different dialysis modalities (PD, HD, HDF and home HD) , present state-of-the-art lectures from an international faculty, and conduct on-line interactive sessions.

This is your opportunity to hear experts sharing best practice and excellence in dialysis care and technology.

Date: 2 & 3 February 2023

Time: 1-5pm GMT
